## New aged care facility

Kewarra Aged Care, a new aged care home at Kewarra Beach, will open in August.

KEWARRA Beach will soon have a brand new aged care community.

Construction is nearing completion and the exciting new home will provide more than 75 aged care beds for residents in the area.

Kewarra Aged Care will offer a choice of suites with large private ensuites, a private dining room to celebrate special occasions, a hairdressing salon, an activities area for arts and crafts, a café to enjoy with family and friends, as well as a variety of

lounge areas with large screen TVs.

The aged care facility will also feature landscaped courtyards and terraces so that residents can enjoy the fresh air and warm sunshine.

The project will include a dedicated and secure dementia wing.

This is ideal for residents who require a higher level of care and assistance with everyday living.

Not only is the home creating a variety of construction and employment

opportunities, but the local traders and allied health care providers will benefit as a result of the increased requirements for fresh produce and personal care services.

Kewarra Aged Care will be located at 110-124 Cottesloe Drive, Kewarra Beach, and is scheduled to open its doors in August.

For further information or to apply for a job, please visit [kewarraagedcare.com.au](http://kewarraagedcare.com.au) or call 1300 543 234.

Pupstars hydrotherapy sessions can benefit all shapes and sizes of dogs with all sorts of injuries.

## Helping dogs recover faster

AS with humans, hydrotherapy is a great way to rehabilitate and provide physiotherapy for dogs.

Pupstars has the only source of hydrotherapy treatment in Cairns at their Marlin Coast location.

"We have a specially made jet pool for dogs to swim in," says Pupstars' Rachel Popp.

"With the aid of a motorised hoist and floatation devices, a

dog of any size and ability can do swimming therapy in a safe, controlled environment."

Rachel says the process is completely supervised and all operated under veterinary referral.

"We have found it to be a successful form of surgery recovery, as well as muscle strengthening and development for a variety of ailments," Rachel says.

From dachshunds with spinal injuries, to labradors with arthritis, to staffies recovering from cruciate surgery, Pupstars hydrotherapy sessions can benefit all shapes and sizes of dogs with all sorts of injuries.

For more information on how hydrotherapy can benefit your dog contact Rachel on 0431 213 971.
